

LMK 331

Screw-in Transmitter

- ▶ thickfilm ceramic sensor
- ▶ flush diaphragm
- ▶ pressure port of stainless steel, PVC, or PVDF
- ▶ accuracy:
 - 0.25 % FSO BFSL
 - (0.5 % FSO IEC 60770)
- ▶ nominal pressure ranges
 - from 0 ... 160 mbar
 - up to 0 ... 60 bar

The screw-in transmitter LMK 331 has been specially designed for level and process measurement.

The ceramic sensors feature high compatibility against aggressive media. Pressure port material is alternatively stainless steel 1.4571 (316Ti), or, for particularly aggressive media, PVDF or PVC.

Due to the semi-flush mounted pressure sensors the LMK 331 can also be used in viscous or contaminated media.

The sensor is sealed against the pressure port with FKM seals. Other elastomers are available on request.

For process measurement applications different process connections are available on request.

Our application engineers would like to assist you in choosing the right combination.

Preferred areas of use are:

- ▶ tank level measurement
- ▶ water and sewage treatment
- ▶ paper industry
- ▶ chemical industry

- ▶ ceramic sensor without oil-filling with high resistance against aggressive media, e.g. acids and lyes
- ▶ small thermal effects
- ▶ good long term stability
- ▶ option Ex:
 - II 1 G EEx ia IIC T4 (stainless steel pressure port)
 - II 2 G EEx ia IIC T4 (plastic pressure port);
 - only for 4 ... 20 mA / 2-wire (TÜV 03 ATEX 2006 X)
- ▶ customer specific versions:
 - special pressure ranges
